

# Web & Email Hosting

To obtain a web or email address you have to purchase a domain. For a yearly subscription we can ensure that you are giving your business a professional edge.

## Key Features:

- Numerous email accounts set up under one domain
- Exclusivity of your own web address and email address for the whole time you are subscribed.
- A cheap and efficient way of advertising your product/s.
- A professional look when sending emails.
- Email hosting can also provide you with tasks, calendars and contacts, and therefore helps organize your business.
- A advantage over your competitors who do not have a website.
- Access to your product/service outside your working hours.
- You can use features on your webpage to gain useful information such as visitor polls, online surveys and website statistics.

## For Example:

John Smith has decided to launch a new flower shop called JS Flowers. He has purchased web hosting and has set up [www.JSFlowers.com](http://www.JSFlowers.com) to showcase the types of flowers he sells.

He then purchased email hosting and on his contact page his email address reads [sales@jsflowers.com](mailto:sales@jsflowers.com). Along with this email address he decided to have one for his accounts team and another for his own use. So an additional two are set up [accounts@jsflowers.com](mailto:accounts@jsflowers.com) and [John.Smith@jsflowers.com](mailto:John.Smith@jsflowers.com).

## Key Benefits:

A website is the perfect place to advertise your business. Potential and existing customers can use it to gain information about your company and also view offers and blogs.

By having a email domain you are able to create numerous accounts.

When more employees join you can simply add new accounts and delete old ones.

## How it works

You simply buy the subscription for your webpage and email domain. It is yours till you decided otherwise.
