How To Activate Your Parental Control

Clear Computings ' Step By Step Guide To Activate Parental Control.

Step 1:

Press Start and enter 'Parental Control' into the search box. Alternatively select 'Control Panel' then ' Parental Control'

Step 2:

You will now be taken to 'Choose a user and set up Parental Controls'. Select the account you wish to set up. NOTE: Make sure you password protect your administrator account, otherwise anyone can turn off Parental Controls and use the computer without any restriction. If you havent set one up a message will appear prompting you to do so, follow these instructions and continue onto step3.

Step 3:

Under ' Set up how {Account name} will use the computer' click 'On, enforce current settings'

Step 4:

Set Time Limits: From this section you can control the time spent on the computer. Just click the time which you would like to restrict and click again if you would like to activate it.

Step 5:

Control Games: You can completely block all games or select games by rating or game names. Alternatively you can also block games on the type of content it contains or the categories.

Step 6:

You can control the applications tht can be visited. Simply select '[Account Name] can only use the programs I allow' and select the programmes that you are happy for them to access

Of course these steps are very basic and nothing is foolproof. We would always recommend monitoring software to keep track of exactly what your child is doing.
